Comptroller County Records

This permit is issued subject to all prior rights on the source, and specifically subject to the terms of stipulation signed by the applicant on January 28, 1926, providing that water sufficient for 1 acre of land only will be diverted from Mill Creek and the surplus water will be returned to the natural channel of said stream. It is understood that the 0.184 of a cubic foot of water per second herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to a beneficial use. A suitable measuring device must be installed and accurate measurements of the water placed to a beneficial use must be included in the proof of such use when filed. The State reserves the right to regulate the use of the water herein granted at any and all times. It is distinctly understood that applicant agrees to the terms contained herein.
